The **Faster** Way to **Prevent** Your Digital Prints From **Cracking...!**

...From desk-top through to full automation

Auto Plus
Creaser/micro-perforator/trimmer

Auto Feed Mk II
Creaser/micro-perforator

Quick Feed Mk II
Creaser/micro-perforator

Card Creaser Deluxe
Creaser

CardFolder
Folding unit

Our **patented Tri-Creaser** Technology is at the **HEART** of our CreaseStream range of solutions.

Creasing, micro-perforating, trimming & folding has never been easier!

Perfect for:
Digital printers, Designers, Copy shops, Photobook producers, Offset printers, Book binders & finishers
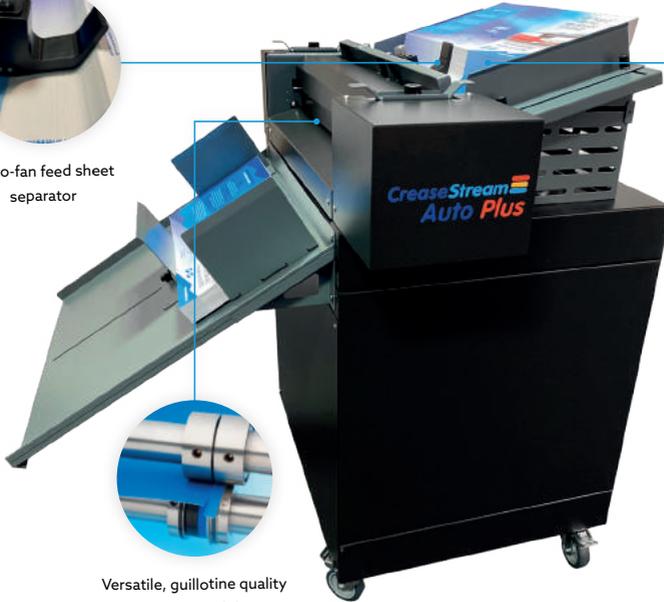

CreaseStream

Auto Plus

With motor, feeder & trimming functionality

Auto-fan feed sheet separator

Unique top-load feeder takes up to 9cm of stock

Versatile, guillotine quality cutting capability

Can output up to 10,000 creased/micro-perforated & trimmed sheets per hour

The impressive **Auto Plus** sits at the top of our range and produces high quality creasing/micro-perforating and trimming applications at an average of 10,000 sheets per hour and can apply a combination of up to 5 tools in a single pass.

This version takes a higher stock load of up to 15cm thanks to a specially designed **auto fan sheet separator** which aids continuous feed consistency.

Other than its speed advantage over our other models, the Auto Plus has the facility to cleanly edge-trim the fed sheets with the offcuts deflecting neatly into a waste bin below.

Choose your own combination of 4 Tools from our creasing, micro-perforating & trimming devices.

### Here are just a few Features & Benefits

- Eliminates cracking on stocks ranging from 100–400gsm
- Easy to set & operate
- Edge-trimming application included
- Includes special auto-fan feed sheet separator
- Tooling section can hold a combination of up to 5 creasing/micro-perforating tools
- Choose from a choice of 4 tooling options as your standard tooling kit
- Can be retro-fitted with our FoldStream plough unit to gently fold creased/micro-perforated products
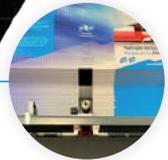

Auto feed Mk II

With motor & feeder

CreaseStream

Auto-fan feed sheet separator

Mobile table is not included and needs to be ordered separately

Unique top-load feeder takes up to 9cm of stock

Can output up to 4,500 creased/micro-perforated sheets per hour

Auto feed Mk II is a modified version of the previous model, taking a higher stock load of up to 9cm thanks to a specially designed **auto fan sheet separator** which aids continuous feed consistency.

This version outputs a steady average of up to 4,500 sheets per hour regardless of whether it applies just one crease or micro-perforation or a combination of 5 applications in a single pass.
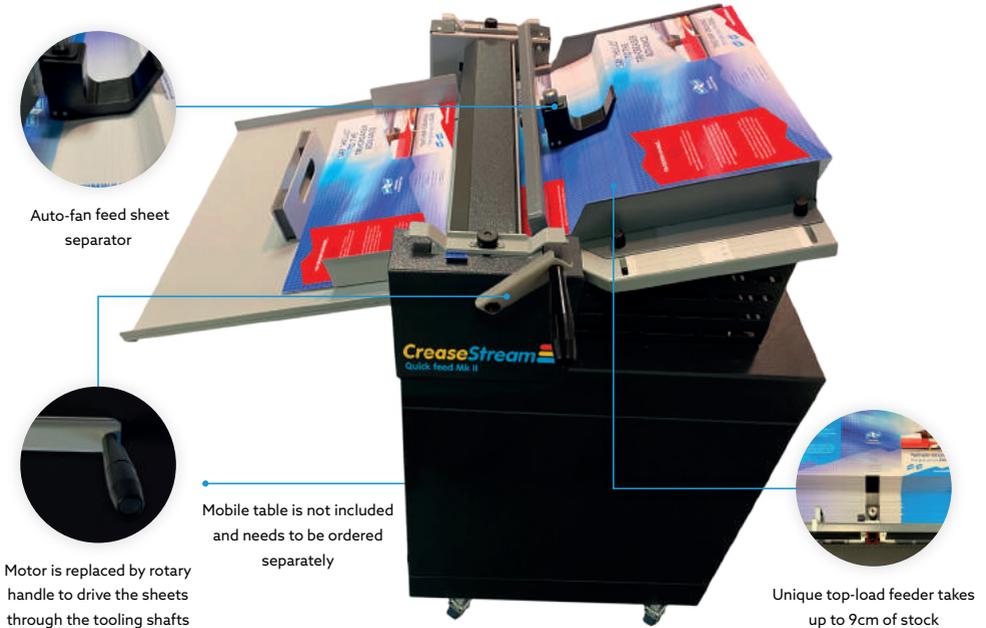

Two tools are included as standard, choose from either 2 x creasing or 1 x creasing & 1 x micro-perforating, with options to add more (tools) if requested.

Here are just a few Features & Benefits

- Eliminates cracking on stocks ranging from 100–400gsm
- Fully automated
- Easy to set & operate
- Can produce up to 5 crease/micro-perf applications in a sinlge pass
- Can be retro-fitted with our **FoldStream plough** unit to gently fold creased/micro-perforated products

Quick feed Mk II

With handle and feeder

Auto-fan feed sheet separator

Motor is replaced by rotary handle to drive the sheets through the tooling shafts

Mobile table is not included and needs to be ordered separately

Unique top-load feeder takes up to 9cm of stock

Can output up to 70 creased/micro-perforated sheets per minute

Quick feed Mk II is a modified version of the previous model, taking a higher stock load of up to 9cm thanks to a specially designed **auto fan sheet separator** which aids continuous feed consistency.

This innovative model is unique in that it does not rely on a motor or electrical input yet can accurately output at speeds more associated with fully automated solutions. Just load the sheets into the feeding section and turn the handle at whatever speed feels comfortable, and simply top up more stock as you go!

Two tools are included as standard, choose from either 2 x creasing or 1 x creasing & 1 x micro-perforating, with options to add more (tools) if requested.

Here are just a few Features & Benefits

- Eliminates cracking on stocks ranging from 100–400gsm
- Simply turn the handle to drive the feeder and activates the tooling shaft
- Easy to set & operate
- Includes special auto-fan feed sheet separator
- Tooling section can hold a combination of up to 5 creasing/micro-perforating tools

Card Creaser Deluxe

Can output up to 25 creased sheets per minute

The manually operated **Card Creaser Deluxe** is our entry level creasing solution and will output your work up to **six times faster** than traditional (pull down handle) matrix versions with **100% accuracy.** Simply set the sheet lays to accommodate the printed stock and move either one or two creases into the required fold position. feeding in each sheet with one hand whilst turning the handle with the other is easy...

Here are just a few Features & Benefits

- Simple to turn rotary handle
- Easy to set & operate
- Includes skewer adjustment that compensates for imperfectly trimmed sheets
- Can produce multiple creases by resetting & running the sheet through again
- Outputs up to 6 x faster than traditional handle creasing solutions

CardFolder

Attaches to hybrid version of Auto feed Mk II

The **CardFolder** with its large diameter fold rollers delivers a **flatter** product.

The CardFolder enables you to create 5-fold types including the most common half, letter or Z folds. The fold is achieved by the combination of manually adjustable fold plates and large-diameter rubber rollers. This simple but revolutionary solution allows you to create one of the most in demand products in the world of low-production digital presses, i.e. producing professional folds on all kinds of stock up to 350gsm.

Here are just a few Features & Benefits

- Folds stock ranges from 120 – 350 gsm
- Large diameter rubber fold rollers help deliver a flatter product
- Simple to set thanks to colour coded crease/fold guide templates that aid make-ready
- Retrofits with a hybrid version of our Auto feed Mk II
- Optional high load feeder guides available

Technical Data Sheet

AUTO PLUS
OUTPUTS UP TO 10,000 SHEETS PER HOUR

Maximum sheet format
52cm (W) X 52cm (L)

Minimum sheet format
8cm (W) X 12cm (L)

Machine weight
80kg (Table included)

Machine dimensions
97cm (L) with delivery
80cm (W) X 94cm (H)

Power supply
Single phase

Stock range
65-400gsm

AUTO FEED MK II
OUTPUTS UP TO 4,500 SHEETS PER HOUR

Maximum sheet format
52cm (W) X 52cm (L)

Minimum sheet format
8cm (W) X 12cm (L)
Power supply

Machine weight
40kg (Without
optional table)

Machine dimensions
87cm (L) with delivery
80cm (W) X 94cm (H)

Power supply
Single phase

Stock range
65-400gsm

QUICK FEED MK II
OUTPUTS UP TO 4,000 SHEETS PER HOUR

Maximum sheet format
52cm (W) X 52cm (L)

Minimum sheet format
8cm (W) X 12cm (L)

Machine weight
37kg (Without optional
table)

Machine dimensions
87cm (L) with delivery
80cm (W) X 94cm (H)

Stock range
65-400gsm

CARD CREASER DELUXE
OUTPUTS UP TO 1,500 SHEETS PER HOUR

Maximum sheet format
52cm (W) X 52cm (L)

Minimum sheet format
5cm (W) X 10cm (L)

Machine weight
17.5kg

Machine dimensions
37cm (L) 63.5cm (W)
X 19cm (H)

Stock range
65-400gsm

CARDFOLDER
CAN OUTPUT UP TO 12,000 SHEETS PER HOUR

Maximum sheet format
52cm (W) X 52cm (L)

Minimum sheet format
(flat sheet)
15cm (W) X 15cm (L)

Machine weight
80kg

Machine dimensions
48cm (L) X 78cm (W)
x 103cm (H)

Power supply
Single phase

Stock range
120-350gsm
